Safety Information

About Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting farther from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Other Important Health and Safety Information. The Xbox Instruction Manual contains important safety and health information that you should read and understand before using this software.

Avoid Damage to Your Television

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be safely played safely on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played safely on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

Thank you for purchasing Sonic Mega Collection™ Plus for Xbox®. Be sure to read this instruction manual thoroughly before you play.

The Status Display at the top of the screen shows the following information at various stages of the game.

Player Numbers and Lives: Shows current level, who is playing and the number of lives remaining. Sonic starts with 3 lives. Earn 20,000,000 points and gain an extra Life!

Emeralds: Shows the number of Emeralds remaining in each level, and how many times an obstacle needs to be hit before opening a path to the Emerald.

Urgent Orders: These messages need a quick reaction!

Loop Successes: Shows how many loops you've completed.

Score Update: Shows your current score.

End totals and Bonuses: Shows the total score for loops, Rings and time at the end of a level.

Sonic Status: "Too Baaad," when you get another shot at the level.

GAME STRATEGY

Each level has a number of Chaos Emeralds you must collect before confronting the boss robot and completing the level.

A variety of hatchways and other obstacles stand between you and the Emeralds. These can only be passed by flicking hidden switches, and by repeated Sonic attack force.

Follow the directions marked in the background to make sure you hit the right spots.

With the blockages cleared, follow the path to find the Emeralds.

When all the Emeralds have been gathered, Sonic must destroy the level boss.

BONUS ROUNDS

At the end of each level, there is a Bonus Round. This is a game of regular pinball and you have 3 balls to play.

PLAY TIPS

- ✦ Launch Sonic by tilting both flippers together with the B button. This is a safe and easy tactic for beginners.
- ✦ Watch out for lights and arrows showing important spots and routes in the background.
- ✦ Catch Sonic on the flippers by holding them up as he enters the Alley Ramp. This way you can aim him more accurately.
- ✦ To shoot straight up, fire when Sonic is near the hinge of a flipper. To launch at an angle, let him roll towards the tip first.
- ✦ Check the Status Display for real-time hints!

DR. ROBOTNIK'S MEAN BEAN MACHINE

TM

Original Release 11/29/1993

Dr. Robotnik is changing the jolly folk of Beanville into devious little robots that will help rid Planet Mobius of music and fun forever. Group the beans together to help them escape while working your way up to the wilier henchbots.

DR.ROBOTNIK'S MEAN BEAN MACHINE

◆ GAME OBJECTIVE

Remove the beans by stacking 4 of the same colored beans together. Attack your opponent by creating chain reactions, but watch out for counter-attacks!

Beans drop from the top of the dungeon in pairs. When 2 beans of the same color touch, they will link. When 4 or more beans are linked together, they disappear from the dungeon. Try to arrange the beans into groups as they drop to prevent them from overfilling.

BEANS

Link 4 or more Beans of the same color to make them disappear from your dungeon. Link them vertically, horizontally, or in clumps. If you drop a pair of beans horizontally on an uneven surface, any Bean left hanging will drop to the lowest point of the column.

The descent rate of the Beans can suddenly speed up, even in the early levels – Don't panic, this is only temporary.

◆ REFUGEE BEANS

Refugee Beans will drop into the opponent's dungeon whenever a player successfully releases a group of Beans. Refugee Beans cannot be linked to any color, and can only leave when neighboring beans disappear.

DR.ROBOTNIK'S MEAN BEAN MACHINE

Check the top of your dungeon for advance warning of how many Refugee Beans are about to drop (see below).

One Small Clear Bean: Single Refugee Bean.

One Big Clear Bean: 6 Refugee Beans.

One Big Red Bean: 30 Refugee Beans and big trouble!

The Greater the number of Beans that vanish (especially in a chain reaction), the greater the number of Refugee Beans will drop into your opponent's dungeon!

SCORES

- ♦ Earn points when your Beans vanish. The bigger the chain reaction, the more bonus you can earn!
- ♦ Earn points by speeding up the descent rate of the Beans falling into your dungeon.
- ♦ If you win a game within a certain amount of time in Scenario Mode (110 seconds for a normal game), you receive a special Time Bonus for each second remaining.

If you've achieved a high score (ranked within the top 5) by the time you end the game, a High Score screen will be displayed. Use **↑ ↓** to select the letters and press **A** button to fill in the next letter of your initials (up to three letters). Use **←** to return and correct any mistakes.

PASSWORD

A password appears when you win a Stage in Scenario Mode. Use this password (Beans) to start future games from the next Stage up.

Select **CONTINUE** from the Scenario Mode and select the type of Beans and press the **B** button to fill in your password. Use the **A** button to delete a bean and return a space.

When you are finished entering your password, press the **START** button or select **END**.
